

Separations: Mothers and Children

Richly imbued with imagination, charming in their irony, and eminently readable, *The Boy with Two Mothers* and *The Life and Death of Adria and Her Children* are alive with a subtle magic, presenting unforgettable characters across a canvas of European socio-political upheaval. These are classic stories which will haunt the mind long after their reading. In each, Bontempelli fulfills what he believed was the writers ultimate goal: to tell a dream as if it were reality and reality as if it were a dream.
