

The Augustan Ages (Classic Reprint)

Excerpt from The Augustan Ages
The disabilities of a short essay like this are confessed in its aim, which is to review more than one literature of Western Europe during a period that opens in the third quarter of the seventeenth century. The later limit varies in different cases. In France it is the death of Louis XIV.; in England the story goes further with Pope and Swift, but is guided rather by schools and fashions than by strict chronology, which may be misleading. As for some other countries, which fought the same battles as France and England, only many years in their wake, I have tried to pack, into what must be regarded as an appendix, the beginnings of the great change, mental and formal, that overtook them also. This latter part has been purposely written on a rather more compressed scale. It was impracticable to go too far into the eighteenth century; and it may be added, with no wish to put off criticism, that the fitting of the countries, groups, and authors into this part of the series has been, as usual, carefully considered, and can be judged fairly when the companion volumes appear.
