

## Disputed Territory.....Earth: Final Contact Vol. 1

Disputed Territory...Earth; covers the six-teen months prior to and the twenty-five years after our first alien contact. Not the kind of first contact we had hoped for. The world, through necessity, is catapulted from near possible extinction to galactic equals with our adversaries. The chain of events set in motion by the landing of alien craft on our planet is a more realistic account of what Earth's policies, postures, reactions and responses would be. Using all technologies available, piracy, luck and the natural human aggressive nature we are able to form and initiate both defensive and offensive retaliations. Helpless the first visit, we as a people could do nothing but watch the devastation unleashed upon the human race and our planet. With world wide cooperation and preparations we were poised and ready upon their return, and do manage to turn the tables on the invaders. Following the footsteps of Nathan Thomas from the age of fourteen to forty you are woven into what may very-well be our future....Or fate.... (suitable to be read by the whole family) Nathaniel Trinity
