

This is a high quality book of the original classic edition. This is a freshly published edition of this culturally important work, which is now, at last, again available to you. Enjoy this classic work. These few paragraphs distill the contents and give you a quick look inside: Thus the work being written in parts by different authors was almost unobtainable, and as the parts which were expounded by Dattaka and the others treated only of the particular branches of the subject to which each part related, and moreover as the original work of Babhravya was difficult to be mastered on account of its length, Vatsyayana, therefore, composed his work in a small volume as an abstract of the whole of the works of the above-named authors. . . . Some learned men say that as Dharma is connected with things not belonging to this world, it is appropriately treated of in a book; and so also is Artha, because it is practised only by the application of proper means, and a knowledge of those means can only be obtained by study and from books. . . . As the acquisition of every object [20]pre-supposes at all events some exertion on the part of man, the application of proper means may be said to be the cause of gaining all our ends, and this application of proper means being thus necessary (even where a thing is destined to happen), it follows that a person who does nothing will enjoy no happiness. . . . Now a girl always shows her love by outward signs and actions, such as the following:-She never looks the man in the face, and becomes abashed when she is looked at by him; under some pretext or other she shows her limbs to him; she looks secretly at him though he has gone away from her side; hangs down her head when she is asked some question by him, and answers in indistinct words and unfinished sentences, delights to be in his company for a long time
