

## Imaging of the Newborn, Infant, and Young Child

Explaining commonly-used terms in paediatrics, this reference is divided into five sections: general topics (chief complaints), specific diseases, syndromes, physical findings, and general tables. The specific diseases section includes 450 examples, and is arranged in a standard format including: differential diagnosis, data gathering, laboratory slides, treatment, follow-up, common questions and answers. The final section features tables such as developmental milestones, measurements, and blood pressures.
