

The 2009 Import and Export Market for Air Conditioning Machines Having a Motor-Driven Fan and Elements for Changing the Temperature and Humidity and Their Parts in Hong Kong

On the demand side, exporters and strategic planners focusing on air conditioning machines having a motor-driven fan and elements for changing the temperature and humidity and their parts in Hong Kong face a number of questions. Which countries are supplying air conditioning machines having a motor-driven fan and elements for changing the temperature and humidity and their parts to Hong Kong? How important is Hong Kong compared to others in terms of the entire global and regional market? How much do the imports of air conditioning machines having a motor-driven fan and elements for changing the temperature and humidity and their parts vary from one country of origin to another in Hong Kong? On the supply side, Hong Kong also exports air conditioning machines having a motor-driven fan and elements for changing the temperature and humidity and their parts. Which countries receive the most exports from Hong Kong? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for air conditioning machines having a motor-driven fan and elements for changing the temperature and humidity and their parts in Hong Kong. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for air conditioning machines having a motor-driven fan and elements for changing the temperature and humidity and their parts for those countries serving Hong

Kong via exports, or supplying from Hong Kong via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In
