These selected paragraphs distill the contents and give you a quick look inside The Accumulation of Capital: Look inside the book: The thread of analysis running through the historical illustrations is not easy to pick up, but the main argument seems to be as follows: As soon as a primitive closed economy has been broken into, by force or guile, cheap mass-produced consumption goods displace the old hand production of the family or village communities, so that a market is provided for ever-increasing outputs from the industries of Department II in the old centres of capitalism, without the standard of life of the workers who consume these commodities being raised.

...The analysis which best fits Rosa Luxemburg's own argument, and the facts, is that armaments provide an outlet for the investment of surplus (over and above any contribution there may be from forced saving out of wages), which, unlike other kinds of investment, creates no further problem by Pg 28 increasing productive capacity (not to mention the huge new investment opportunities created by reconstruction after the capitalist nations have turned their weapons against each other).

About Rosa Luxemburg, the Author: Bei Eberts Versuch, den nach dem Reichsratskongress immer starker

spartakistischen Berliner Vollzugsrat (gema?igte Mitglieder und Unterstutzer hatten ihn zunehmend verlassen, nachdem nach dem Reichsrategkongress der Weg zu allgemeinen Wahlen offen erschien) zu entmachten und die spartakistenfreundliche Volksmarinedivision, die inzwischen das Berliner Stadtschlo? besetzt hatte, aufzulosen, kam es am 24. ...In kritischem Bezug auf die Marxschen Ausfuehrungen zum Schema der erweiterten Reproduktion (Kapitalakkumulation) im zweiten Band des Kapital, weist sie unter anderem auch mit Bezug auf Engels Bemerkungen zu Marx Manuskripten nach, dass Marx diesen Punkt nicht abschlie?end und widerspruchsfrei ausgearbeitet hat, sondern vielmehr seiner eigenen Losung an anderer Stelle, namlich im dritten Band und in den Theorien uber den Mehrwert, widerspricht und seine Losung eine einfache arithmetische Konstruktion ist.
