

The book sets out to show the current state of macroeconomics, from three main perspectives: methodology, theory and economic policy. It is built on extensive conversation with some of the worlds leading macroeconomists. These are based on wide questionnaires, covering jointly almost all the topics of macroeconomic theory, as well as questions of methodology, real economy, and even academic systems and future lines of research. Some of the questions have been put to all the respondents or many of them, with the aim of bringing out their different positions. References about authors and themes are also provided.
